

Laura Venuti

Research Scientist

SETI Institute
339 Bernardo Ave, Suite 200
Mountain View, CA 94043, USA
✉ lvenuti@seti.org

Education

- 2012–2015 **Ph.D. in Astrophysics,**
Institut de Planétologie et d’Astrophysique de Grenoble (IPAG),
Université Grenoble Alpes (UGA), France,
Joint degree with Università degli Studi di Palermo, Italy.
Dissertation: *Accretion regimes and variability in young stars: imprints on UV photometry*
Graduated on October 23, 2015
- 2010–2012 **Master’s Degree in Physics (Astrophysics curriculum),**
Università degli Studi di Palermo, Italy.
Thesis: *Extensive studies of T Tauri stars and of their variability: u,g,r,i photometry of the young open cluster NGC 2264*
Graduated on October 25, 2012, with highest grades and honors
- 2007–2010 **Bachelor’s Degree in Physical Sciences,**
Università degli Studi di Palermo, Italy.
Thesis: *Spectral energy distributions of young stars with disks*
Graduated on October 28, 2010, with highest grades and honors

Employment history and internships

- 2021–present **Research Scientist, SETI Institute**, Mountain View, CA, USA.
○ *Science focus:* Accretion dynamics, magnetic activity, and stellar multiplicity in the ~1 Myr-old Lagoon Nebula region
○ *Method:* Analysis of Kepler/K2 high-precision photometry, VLT/FLAMES spectroscopy, and Gemini/Zorro speckle imaging data
- 2018–2021 **NASA Postdoctoral Program (NPP) Fellow**, NASA Ames Research Center, Mountain View, CA, USA.
○ *Science focus:* Physics and timescales of young star variability as a function of spectral class in the ~1 Myr-old Lagoon Nebula region
○ *Method:* Analysis of Kepler/K2 high-precision photometry and VST/OmegaCAM multi-band photometry
- 2018 **Visiting Scholar**, Cornell Center for Astrophysics and Planetary Science, Cornell University, Ithaca, NY, USA.
(3 months)
○ *Science focus:* Disk accretion and star-disk interaction in young, low-mass stars and brown dwarfs in the ~8–10 Myr-old TW Hydriæ association
○ *Method:* Analysis of VLT/X-shooter wide-range spectroscopy (300–2500 nm)
- 2018 **Postdoctoral Researcher**, Eberhard Karls Universität, Institut für Astronomie & Astrophysik Tübingen (IAAT), Germany.
(6 months)
○ *Science focus:* Disk accretion at the age of disk dispersal in the ~8–10 Myr-old TW Hydriæ association
○ *Method:* Analysis of VLT/X-shooter wide-range spectroscopy (300–2500 nm)
- 2015–2017 **Postdoctoral Researcher**, Istituto Nazionale di Astrofisica – Osservatorio Astronomico di Palermo (INAF–OAPa), Italy.
○ *Science focus:* Membership census, structure, and star-formation history of the ~3–5 Myr-old cluster NGC 2264; testing of photometric methods to reveal and characterize young clustered populations of low-mass stars in crowded fields, as part of the LSST–INAF collaboration
○ *Method:* Analysis of VLT/FLAMES high-resolution spectroscopy from the Gaia-ESO Survey; analysis of deep multi-band photometry from large-scale surveys (Pan-STARRS1, 2MASS, UKIDSS)

- Nov. 2015 **Postdoctoral Researcher**, *Centre National de la Recherche Scientifique (CNRS) and IPAG, Grenoble, France.*
 - *Science focus:* Rotation–accretion connection in young stars belonging to the NGC 2264 cluster
 - *Method:* Analysis of *CoRoT* high-precision time series photometry from the CSI 2264 campaign
- 2015 **Service Observer**, *Télescope Bernard Lyot, Pic du Midi, Observatoire Midi-Pyrénées, France.*
(1 week)
 - *Objective:* Training to schedule and perform observations with the spectropolarimeter NARVAL
 - *Tasks:* Instrument calibration, target selection, data acquisition
- 2012–2015 **Ph.D. student**, *UGA and IPAG, Grenoble, France.*
 - *Science focus:* Statistical study of disk accretion, variability, and rotation in the young cluster NGC 2264
 - *Method:* Analysis of multi-wavelength photometric monitoring obtained with CFHT/MegaCam and high-precision time series photometry obtained with *CoRoT* as part of the CSI 2264 campaign
- 2012 **Erasmus exchange student**, *Université Joseph Fourier (UJF) and IPAG, Grenoble, France.*
(6 months)
 - *Science focus:* Characterization of spot-induced and accretion-induced variability signatures on young stars in the open cluster NGC 2264
 - *Method:* Analysis of optical and UV photometry (*u, g, r, i*) obtained with CFHT/MegaCam
- 2009–2010 **Undergraduate intern**, *INAF – Istituto di Astrofisica Spaziale e Fisica Cosmica, Palermo, Italy.*
(5 months)
 - *Science focus:* Variability and orbital parameters of the X-ray binary IGR J17511-3057
 - *Method:* Analysis of XMM-Newton data

Scholarships, fellowships, grants, and awards

- 2021 Co-recipient (co-PI) of a Preparing for Astrophysics with LSST Program's Kickstarter Grant
SETI Institute, USA
- 2021 Selected for an ESA Research Fellowship in Space Science (*offer declined*)
ESA/European Space Research and Technology Centre, The Netherlands
- 2020 Co-recipient (co-I) of a NASA Astrophysics Data Analysis Program (ADAP) grant
SETI Institute, USA
- 2018 Recipient of a NASA Postdoctoral Program (NPP) Fellowship
Universities Space Research Association, USA
- 2017 Recipient of interim research funding from the Bridging Funds Excellence Initiative
Eberhard Karls Universität Tübingen, Germany
- 2012 Recipient of a doctoral scholarship from the French Ministry of Higher Education and Research
Université Grenoble Alpes, France
- 2011 Recipient of an Erasmus mobility scholarship
Università degli Studi di Palermo, Italy
- 2009 Recipient of a merit-based reward for undergraduate students pursuing a degree in Sciences
Università degli Studi di Palermo, Italy

Participation to international projects and collaborations

- CSI 2264 **Coordinated Synoptic Investigation of NGC 2264** (PI: J. Stauffer and G. Micela; ~50 Co-Is).
Specific involvement: Analysis of optical and UV light curves (CFHT/MegaCam, *CoRoT*) to investigate disk accretion, accretion variability and rotation of young stars in NGC 2264.
- SPIRou **SpectroPolarimètre InfraRouge** (PI: J.-F. Donati and R. Doyon; ~100 scientists). *Specific involvement:* Member of the SPIRou Science Team for the preparation of the Legacy Survey component on magnetic properties of young, disk-bearing stars.
- GES **Gaia-ESO Survey** (PI: G. Gilmore and S. Randich; >400 Co-Is). *Specific involvement:* Analysis of spectroscopic and photometric data for NGC 2264 to investigate the structure and star formation history of the cluster.

- JEDI ***JEts and Disks at INAF*** (~ 30 scientists). *Specific involvement:* Analysis of VLT/X-shooter spectra for disk-bearing young stars to investigate the final stages of disk accretion.
- LSST ***Vera C. Rubin Observatory's Legacy Survey of Space and Time***. *Specific involvement:* Using deep, multi-wavelength photometry to reveal and characterize star clusters and young stellar populations from the analysis of M-stars in the field; investigating the variability of young stars from hours to years timescales; contributing to the survey strategy planning by optimizing the observing cadence to be implemented for static and dynamic young star cluster science.
- PENELLOPE ***European Southern Observatory (ESO) program to complement the Hubble UV Legacy Library of Young Stars (ULLYSES) program*** (PI: C. F. Manara; ~ 70 scientists). *Specific involvement:* Analysis of UV/optical/IR spectra to study the variability and evolution of disk accretion in young stars.

Professional service

- Referee for *Astronomy & Astrophysics*, *Astronomische Nachrichten*, *The Astronomical Journal*
- Panelist for the *National Science Foundation's (NSF) Astronomy & Astrophysics program*
- External reviewer for NASA's *Future Investigators in NASA Earth and Space Science and Technology (FINESST)* program
- Proposal reviewer for the *Gemini Fast Turnaround* program
- Member of the Scientific Organizing Committee, TASC6/KASC13 Workshop *Asteroseismology in the Era of Surveys from Space and the Ground: Stars, Planets, and the Milky Way*
- External collaborator for the *Requirements Baseline–Near-IR & Far-IR component of the European Stratospheric Balloon Observatory Design Study*

Invited colloquium and seminar talks

- Apr. 2019 Center for Integrative Planetary Science, UC Berkeley, CA, USA
 Jan. 2018 INAF–Osservatorio Astronomico di Roma, Italy
 Mar. 2017 Institut für Astronomie & Astrophysik, Tübingen, Germany

Talks in international meetings, workshops and conferences

- Oct. 2021 Contributed talk, ***Star Formation: From Clouds to Disks***, Malahide, Ireland.
 Presentation title: *Multicolor Variability of Young Stars across the Mass Spectrum*
- Jan. 2021 Contributed talk, ***American Astronomical Society 237th Meeting***, virtual conference.
 Presentation title: *Multicolor Variability of Young Stars in the Lagoon Nebula: Physical Drivers and Intrinsic Timescales*
- Aug. 2019 **Keynote presentation, *Stars and their Variability, observed from Space***, Vienna, Austria.
 Presentation: *Dynamics of star-disk interaction processes in young, low-mass stars as seen from space*
- June 2019 Contributed talk, ***European Week of Astronomy and Space Science***, Lyon, France.
 Title: *A dynamical view of star-disk interaction in young star clusters from space-based photometry*
- June 2019 Contributed talk, ***Gaia's view of Pre-Main Sequence evolution: Linking the T Tauri and Herbig Ae/Be stars***, Leeds, UK.
 Title: *A dynamical view of star-disk interaction processes in young open clusters as seen from space*
- Mar. 2019 Contributed talk, ***Kepler & K2 Science Conference V***, Glendale, California, US.
 Presentation: *A Dynamical View of Star-disk Interaction Processes in the Lagoon Nebula with Kepler/K2*
- Oct. 2018 **Invited review, *Take a Closer Look: The innermost region of protoplanetary discs and its connection to the origin of planets***, Garching bei München, Germany.
 Title: *Observations of star-disk interaction and link to disk evolution at the epoch of planet formation*

- June 2018 **Invited talk, *Protoplanetary disks seen through the eyes of new-generation high-resolution instruments***, Rome, Italy.
 Presentation title: *Accretion variability in young, low mass stars*
- Sept. 2017 Contributed talk, ***Gaia-ESO Survey Fourth Science Meeting***, Catania, Italy.
 Presentation title: *Substructures, age spread and sequential star formation in the young cluster NGC 2264*
- Nov. 2016 Contributed talk, ***TOUPIES closing meeting***, Montpellier, France.
 Presentation title: *Rotation–accretion connection in young stars: the case of NGC 2264*
- Aug. 2016 Contributed talk, ***Star Formation 2016***, Exeter, United Kingdom.
 Presentation title: *Variety of accretion regimes in the young open cluster NGC 2264*
- June 2016 Contributed talk, ***Third JEDI progress meeting***, Arcetri, Italy.
 Presentation title: *Variety of accretion regimes in young low-mass stars: the NGC 2264 cluster*
- May 2016 **Solicited talk, *Second SPIRou science meeting***, Nice, France.
 Presentation title: *Regimes of magnetospheric accretion in CTTS*
- Nov. 2015 **Invited talk, *First MaTYSSE meeting***, Toulouse, France.
 Presentation title: *Variety of accretion regimes in classical T Tauri stars*
- Oct. 2015 Contributed talk, ***Exchanging mass, momentum, and ideas: connecting accretion and outflows in young stellar objects***, Noordwijk, The Netherlands.
 Presentation title: *Accretion regimes and variability in the young open cluster NGC 2264*
- Nov. 2014 **Solicited talk, *Rencontres d'Astrostatistique 2014***, Grenoble, France.
 Presentation title: *Looking for correlations in censored data: the Kendall tau test*
- Oct. 2014 Contributed talk, ***2nd Edition of the ZAH-IPAG-MPIA Workshop***, Ringberg, Germany.
 Presentation title: *Accretion variability in the young open cluster NGC 2264*

Selected posters in international conferences

- Aug. 2021 ***TESS Science Conference II***, virtual conference.
L. Venuti, A. M. Cody, L. M. Rebull, G. Beccari, M. Irwin, S. Thanvantri, S. B. Howell, and G. Barentsen: *Multicolor Variability of Young Stars with Disks: Insights from Coordinated Space and Ground Observations*
- July 2021 ***2021 Sagan Summer Workshop – Circumstellar Disks and Young Planets***, virtual conference.
L. Venuti, A. M. Cody, L. M. Rebull, G. Beccari, M. Irwin, S. Thanvantri, S. B. Howell, and G. Barentsen: *Multicolor Variability of Young Stars with Disks: Insights from Coordinated Space and Ground Data*
- Mar. 2021 ***Cool Stars 20.5***, virtual conference.
L. Venuti, A. M. Cody, L. M. Rebull, G. Beccari, M. Irwin, S. Thanvantri, S. B. Howell, and G. Barentsen: *Multicolor Variability of Young Stars in the Lagoon Nebula: Driving Causes and Intrinsic Timescales*
- June 2020 ***AAS 236th Meeting***, virtual conference.
L. Venuti, A. M. Cody, G. Beccari, L. Rebull, and S. B. Howell: *Dynamics of Star-Disk Interaction Processes in Young Stars revealed by Kepler/K2*
- June 2017 ***Francesco's Legacy: Star Formation in Space and Time***, Florence, Italy.
L. Venuti, L. Prisinzano, G. Sacco, E. Flaccomio, R. Bonito, F. Damiani, G. Micela, M. Guarcello, GES and CSI 2264 Collaborations: *Age spread and sequential star formation in the young cluster NGC 2264*
- June 2014 ***Cool Stars 18***, Flagstaff, Arizona, US.
L. Venuti, J. Bouvier, J. Irwin and the CSI 2264 Team: *Mapping accretion and its variability in the young cluster NGC 2264*
- July 2013 ***Protostars and Planets VI***, Heidelberg, Germany.
L. Venuti, J. Bouvier, J. Irwin, J. R. Stauffer, A. M. Cody, G. Micela and the CSI 2264 Team: *UV variability and accretion in PMS stars in NGC 2264*
- June 2012 ***Cool Stars 17***, Barcelona, Spain.
J. Bouvier, **L. Venuti**, J. Irwin, J. Stauffer and the CSI 2264 Collaboration: *The u-band variability of T Tauri stars in NGC 2264*
