THE SETI INSTITUTE

Carl Sagan Center
Mountain View, CA 94043

NASA AMES RESEARCH CENTER

Space Science & Astrobiology Division
Moffett Field, CA 94035

EDUCATION

Ph.D. in Chemistry

"Spectroscopic analyses of chemically altered montmorillonites and applications to the soils on Mars"
(advisor: John O. Edwards, co-advisor: Carlé M. Pieters, Geological Sciences)

M.S. in Applied Earth Science, Remote Sensing Program Stanford University, 1988
School of Earth Science (advisors: Ronald J. P. Lyon and George A. Parks)

B.S. in Chemistry Stanford University, 1988

PROFESSIONAL POSITIONS

Science Council, The SETI Institute (contractor at NASA-Ames)	2015 - present
Visiting Scientist and Guest Professor, Free University of Berlin & DLR-Berlin	2014 - 2015
Senior Research Scientist, The SETI Institute (contractor at NASA-Ames)	2010 - 2015
Research Scientist, The SETI Institute (contractor at NASA-Ames)	March 1999 - 2009
Research Associate, NRC Fellow at NASA-Ames	March 1997 - February 1999
Postdoctoral Research Associate, DLR-Berlin	September 1994 - February 1997

SUMMARY OF PUBLICATIONS

h-index: 56 (as of February, 2022) at Google Scholar
Peer-reviewed publications: 155 (as of February, 2022)
Conference presentations: 500 (as of February, 2022)

CURRENT RESEARCH ACTIVITIES

Chair of Astrobiology Group and Member of Science Council, Carl Sagan Center: Leading group of ~20 research scientists, including organizing seminars and group discussions, facilitating proposal idea generation and proposal reviews, participating in management decisions at the SETI Institute.

Mars surface composition and processes: Analysis of hyperspectral CRISM imagery and data to characterize surface minerals; Focus on identifying OH/H₂O-bearing minerals (e.g. clays, sulfates) to understand aqueous processes and geochemical environment on Mars; coordinating mineral detections from CRISM imagery with stratigraphy and surface morphology from HiRISE and HRSC; Characterizing iron oxide and sulfate minerals using MER/Pancam multichannel data; Development of hyperspectral analysis tools together with students/colleagues to design and implement Gaussian modeling techniques and clustering algorithms for spectral analysis.

Mars Analog studies: Analysis of visible to thermal IR laboratory data of analog materials (and minerals found in them) for comparison with spacecraft data of the martian surface; Emphasis on volcanic alteration products (e.g. Hawaii and Iceland), martian meteorites, hydrothermal regions, acidic aqueous sites, and sediments from cold desert environments.

Laboratory alteration experiments: Investigation of the effects of chemical alteration and/or the martian environment on minerals and Mars analog materials.

Spectroscopy of Asteroids and Meteorites: Analysis of asteroid spectra (Ceres, 2008 TC3, C-, F- and S-type) together with lab spectra of meteorites, rocks, and related lab mixtures in order to develop an association between meteorites and their parent bodies.

Relationships between organisms and minerals: Minerals as Solar UV Shield for Photosynthetic Organisms: Performing experiments to explore the ability of iron oxide species to protect photosynthetic organisms from damaging UV rays. Phyllosilicates and the Origin of Life: Investigating interactions of phyllosilicate minerals with organic molecules, cations, and anions. Performing lab experiments to test remote detection of organics and salts bound to phyllosilicates.

HONORS & AWARDS

Professional Awards:

Gilbert Award, the Geological Society of America's highest honor in Planetary Geology.	2021
Carl Sagan Center Director's Award, SETI Institute.	2021
Elected as Fellow of the American Geophysical Union.	2020
Elected as Fellow of the Mineralogical Society of America.	2018
Elected as Fellow of the Geological Society of America.	2018
Marion L. and Chrystie M. Jackson Mid-Career Clay Scientist Award.	2016
Elsevier Certificate for Highly Cited Research	2016
Humboldt Award for research in Germany.	2015
Helmholtz International Fellow Award.	2013
NASA Public Service Award to MRO CRISM Team for developing CRISM instrument	2011
NASA Public Service Award to MRO CRISM Team for significantly advancing our understanding of the martian surface, its composition, and evolution.	2011
Characterization of "Water on Mars" by MRO Team, Top Ten Insights of Decade, <i>Science</i> .	2010
Featured Scientist, Astronomy Magazine, "A Day in the Life of an Astronomer".	March, 2010
Best Paper Award (co-author), IEEE Workshop on Hyperspectral Image and Signal Processing: Evolution in Remote Sensing, Grenoble, France.	2009
Kavli Fellow, Kavli Frontiers of Science Symposium, Irvine, CA.	2008
NRC Fellow, NASA-Ames Research Center, Moffett Field, CA.	1997-1999
Alexander von Humboldt Fellow, Berlin, Germany.	1994-1996

Scholarships and Awards:

DPS, Student Travel Award, 27th Annual Meeting	1995
Meteoritic Society, Student Travel Award, 57th Annual Meeting	1994
San Juan Capistrano Research Institute Conference on Infrared Spectroscopy, Student Travel Award,	1991
Meteoritic Society, Student Travel Award, 54th Annual Meeting	1991
Amelia Earhart Fellowship Award, Zonta International Foundation	1993-1994
NASA Graduate Student Researchers Program Fellowship	1990-1994
Research Fellowship, School of Earth Science, Stanford University	1987-1988
Stanford University School of Earth Sciences Undergraduate Research Grant	1986-1987
Fannie and John Hertz Foundation Fellowship	1983-1987
Nahas Foundation Scholarship	1983-1987
General Electric Co. Scholarship for Women in Science	1983-1987
Livermore Boosters Olympian Award: Outstanding Athletics and Academics	1983-1987
Elks Association (Calif.) Most Valuable Student Award: Scholarship & Leadership	1983
Bank of America Achievement Award in Science and Mathematics	1983
Josten's Foundation Award	1983
Valedictorian, Livermore High School	1983

PLANETARY MISSION PARTICIPATION

International MSR Objectives and Samples Team (iMOST): Invited to join Science Study Team for the investigation of the potential science and engineering value of samples delivered to Earth by Mars sample return, 2018-2019.

Mars Sample Return: Invited to join Science Study Team for the International Mars Exploration Working Group (IMEWG) for scientific planning of Mars Sample Return (MSR), 2017.

Mars Landing Site Characterization: Prepared presentations and reports on potential sites at Juventae Chasma and Mawrth Vallis; attended multiple landing site workshops for Mars Science Lab (MSL), MER, and other missions, 2002-present.

Compact Reconnaissance Imaging Spectrometer for Mars (CRISM) on Mars Reconnaissance Orbiter (MRO): Co-Investigator working on spectral identification tasks related to hydrated minerals and surface alteration, 2001 to present.

Marsokhod Rover Tests at Silver Lake, CA: participated as remote scientist during rover field activities; assisted in spectral analyses of data collected from mission, 1999.

Center for Mars Exploration (CMEX): participated in projects and meetings on Mars Landing Site development and furthering information technology capability for Martian Missions, 1998-2004.

Pathfinder Mineralogy Science Operations Working Group (SOWG): performed spectral analyses of Martian rocks and soils based on lab spectra of analogues, 1997-1999.

COMMUNITY ACTIVITIES

Journal & Book Editor:

- Cambridge University Press: "Remote Compositional Analysis", 2019.
- Associate Editor, *American Mineralogist*, 2013- present; Editor, *Icarus*, 2003-2004; Consulting Editor, 2005 – present; Special Issue Guest Editor, *Clay Minerals*, 2007-2008.

Scientific Reviewer: multiple NASA panels, NSF & European proposal agencies, 1999 - present; Reviewer for journals including *Science*, *Nature*, *JGR*, *Icarus*, *American Mineralogist*, *Clays & Clay Minerals*.

Member: multiple NASA steering groups, 1994-present; NASA's Astrobiology Institute, 2003-2021; NASA's Network For Life Detection (NFoLD) Research Coordination Network, 2020-present.

Council Member: *Clay Minerals Society*, 2019-2021.

Student Grants Committee: *Clay Minerals Society*, 2018-2022.

Science Organizing Committee:

International Mineralogical Association General Meeting, Lyon, 2022.

Ninth International Conference on Mars, Pasadena, CA, July, 2019.

"The New Martian Chemistry Workshop", Tufts University, Boston, July, 2009; <http://www.lpi.usra.edu/meetings/marschem2009/>.

"Workshop on the Microstructure of the Martian Surface", Copenhagen, August, 2009; <http://www.nbi.ku.dk/forskningsgrupper/mars/english/soil-workshop/>.

"Workshop on Martian Phyllosilicates: Recorders of Aqueous Processes?", CNES, Paris, October, 2008; http://www.ias.u-psud.fr/Mars_Phyllosilicates/.

Convener:

"Clay Minerals on Mars and Other Planetary Bodies", Clay Minerals Soc., Atlanta, GA, June, 2016.

"Earth analogues as case studies for Martian geological materials and processes", AGU, San Francisco, CA, December, 2015.

"Unraveling Mars: Insights from mineralogy and geochemistry", EGU, Vienna, Austria, April, 2015.

"Stratigraphy of Aqueous Mineralogy on Mars Through Coordinated Analyses of Mineralogy, Geochemistry and Morphology", EPSC, Estoril, Portugal, 2014.

"Phyllosilicates on Mars as Indicators of Aqueous Processes and Geochemical Environments", EPSC, London, UK, 2013.

"What Lurks in the Martian Rocks and Soil? Investigations of Sulfates, Phosphates, and Perchlorates", AGU, San Francisco, CA, December, 2012.

"Mineralogy as an Indicator of Aqueous Processes on Mars", Astrobiology Science Conference, Atlanta, GA, April, 2012.

"Coordinated Mineralogy and Morphology Studies of Martian Aqueous Deposits", AGU, San Francisco, December, 2011.

Invited Lecturer:

"The Surface of Mars: Mineralogy as an indicator of water, geochemistry and surface processes", The SETI Institute REU Program, June 14, 2021.

"Remote characterization of minerals on Mars to track surface weathering and aqueous processes on early Mars", Invited Speaker at the ASA-CSSA-SSSA International Annual Meeting, 2020.

"Phyllosilicates provide clues about the aqueous environment and climate on early Mars", Invited Speaker at the Clay Minerals Society Annual Meeting, 2020.

"The Surface of Mars: Mineralogy as an indicator of water, geochemistry and surface processes", The SETI Institute REU Program, June, 2020.

"Characterizing the surface of Mars through remote spectral identification of minerals", Keynote Speaker at *9th European Conference on Mineralogy and Spectroscopy*. Prague, Czech Republic., September 11, 2019.

"The Surface of Mars: Mineralogy as an indicator of water, geochemistry and surface processes", The SETI Institute REU Program, June, 2019.

"Exploring Mars Using a Rover.", Presentation and demonstration to 7th grade students at Alto International School about martian rovers, Menlo Park, CA, May, 2019.

"Constraints on the Climate of Early Mars from the Phyllosilicate Record", Colloquium, Department of Geology and Geophysics, Louisiana State University, Baton Rouge, LA, April, 2019.

"The Places You'll Go...The Things You Can Do: Planning Missions to Mars", Presentation and demonstration to 5th grade students at Alto International School, Menlo Park, CA.

"Investigating Mars: What We Learn from Analog Sites", Osher Lifelong Learning Institute, Santa Clara University, Santa Clara, CA, April 15, 2019.

"Clues about the Early Martian climate from the phyllosilicate record: How warm is warm?", Klepser Seminar Series, Department of Earth and Planetary Sciences, University of Tennessee, Knoxville, TN, April, 2019.

"Coordinated Analyses of Lab, Field and Remote Observations for Understanding Surface Processes on Mars", . Planetary Geoscience Institute Brown Bag Lunch Seminar, Department of Earth and Planetary Sciences, University of Tennessee, Knoxville, TN, April, 2019.

"The Surface of Mars: Mineralogy as an indicator of water, geochemistry and surface processes", The SETI Institute REU Program, June, 2018.

"Formation of Surface Clays via Short-Term Warmer and Wetter Climate Excursions on a Largely Cold Ancient Mars", Exobiology Branch Seminar, NASA Ames, June, 2018.

"Roving on Mars: Revving up for Future Exploration of the Red Planet", SETI Institute Colloquium, Menlo Park, CA, March, 2018.

"Astrobiology at Mars", Osher Lifelong Learning Institute, University of California, Berkeley, CA, February, 2018.

"Diverse Early Aqueous Environments and Climate on Mars Revealed by the Phyllosilicate Record", Fourth International Conference on Early Mars, Flagstaff, AZ, October, 2017.

"The Martian' traverse and what Mark Whatney missed along the way", Doug Duncan's University of Colorado Eclipse Event, Jackson Lake Lodge, Grand Tetons, WY, August, 2017

"Clays on Mars: How We Found Them and Why They are Important for Astrobiology", SETI Institute Colloquim, November, 2016.

"Jackson Award Lecture. Clays on Mars: How We Identified Them and What They Tell Us About the Early Environment", Clay Minerals Society Annual Meeting, Atlanta, GA, June, 2016.

- "Astrobiology at Mars", Osher Lifelong Learning Institute, Santa Clara University, Santa Clara, CA, April 21, 2016.
- "Investigating Mars Analog Sites for Understanding Aqueous Outcrops on Mars", Université Claude Bernard , Lyon, France, April, 2015.
- "The Composition of Mars as Determined from Orbital Remote Sensing", Hollabrunn Technical College, Hollabrunn, Austria, April, 2015.
- "CRISM analysis of impact-induced hydrothermal clay outcrops on Mars", Natural History Museum, Berlin, January, 2015.
- "What Hyperspectral Remote Sensing can Tell us about Aqueous Alteration on Mars", Institute for Earth and Environmental Sciences Colloquium, University of Potsdam, Germany, January, 2015.
- "Aqueous Alteration at Mawrth Vallis, Mars Through Analysis of Spectral Imagery and Mars Analog Studies" Astrophysics Colloquium, IAS, Paris, France, November, 2014.
- "Mineralogy on Mars with CRISM-based infrared spectroscopy", Institute of Geological Sciences Colloquium, Free University of Berlin, Berlin, Germany, November, 2014.
- "Martian Surface Mineralogy as an Indicator of Geochemical Environments and Potentially Habitable Sites", Biosignatures Across Space and Time, Bergen, Norway, May, 2014.
- "Hyperspectral Imaging of Mars: Mineralogy as an indicator of water, geochemistry and surface processes", The SETI Institute REU Program, June, 2013.
- "Astrobiology at Mars: Mineralogy as an Indicator of Water, Geochemistry and Surface Processes", Free University of Berlin, Berlin, Germany, July, 2012.
- "Characterization of the mineralogy and morphology of geologic units at Libya Montes, Mars", German Aerospace Agency, Berlin, June, 2012.
- "Hyperspectral Imaging of Mars: Mineralogy as an indicator of water, geochemistry and surface processes", The SETI Institute REU Program, June, 2012.
- "Hyperspectral Imaging of Mars: Mineralogy as an indicator of water, geochemistry and surface processes", Lawrence Livermore National Lab, October, 2011.
- "The Search for Life on Mars: Mineralogy as an Indicator of Water and Environmental Conditions", The SETI Institute REU Program, June, 2010.
- "Life in the Antarctic Dry Valleys", SETICON, Santa Clara, CA, August, 2010
- "The Surface of Mars: Mineralogy as an Indicator of Water and Environmental Conditions", The SETI Institute REU Program, June, 2010.
- "Could the Large Phyllosilicate Outcrop at Mawrth Vallis on Mars be Sedimentary in Origin?", Sedimentology Group, School of Earth Sciences, Stanford University, April, 2010.
- "The Search for Life on Mars: Mineralogy as an Indicator of Water and Environmental Conditions", Astrobiology Space Exploration Course #183, Human Biology Department, Stanford University, February, 2010.
- "Aqueous Processes on Mars: What We Have Learned from Spectroscopy", Whole Earth Seminar, Earth and Planetary Sciences Department, UC Santa Cruz, October, 2009.
- "The Surface of Mars: Mineralogy as an Indicator of Water and Environmental Conditions", SETI Institute Colloquium, July, 2009.
- "The Surface of Mars: Mineralogy as an indicator of Water and Environmental Conditions", Livermore Public Library, sponsored by AAUW, March, 2009.
- "Looking at Mars through a CRISM: What we know and how we are learning more", Summer Science Program, New Mexico Tech., July, 2005.
- Outstanding Women Scientists Series Lecture: "*The Surface of Mars: What We Know and How We're Learning More*", Indiana University, October, 2004.
- "Are nanophase iron oxides responsible for the red color of Mars?" Geology Department, UC Davis, June, 2003.
- Earth Sciences Division, NASA-Ames Research Center, Moffett Field, CA, January, 1999.
- Space Sciences Division, NASA-Ames Research Center, Moffett Field, CA, March, 1998.

Planetary Physics Group, DLR-Berlin, (given in German), February, 1997.
Los Alamos National Laboratory, Los Alamos, NM, November, 1996.
Department of Physics, University of Medicine, Luebeck, Germany, (given in German) June, 1996;
Exobiology Branch, NASA-Ames Research Center, Moffett Field, CA, March, 1996
Dept. of Inorganic Chemistry, Academy of Science, Bratislava, Slovak Republic, January, 1996.

Educational Outreach Activities:

1. Trustee for the *Summer Science Program, Inc. (SSPI)*, an educational program in math and science for accelerated high school students (www.summerscience.org) 2002-present.
2. Led multiple science activities and demonstrations, Elementary and Middle School, German American International School & Alto International School, Menlo Park, 2010-2019.
3. Mentor & Speaker, Professional Women's Night, *Tech Trek Marie Curie Camp* for 7th grade girls, Stanford University, 2013, 2017, 2018.
4. Assistant, *Science on Saturday Lecture Series* for middle school students, sponsored by LLNL and Sigma Xi, Livermore, CA, Saturday mornings February - April, 1998.
5. Panelist, *Tri-Valley Expanding your Horizons Conference*; day-long program for middle school and high school girls to encourage them to pursue careers in science, sponsored by LLNL, at Los Positos College, Livermore, CA, 1985.

MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS

American Geophysical Union	1998 – present
Geological Society of America	1997 – present
Mineralogical Society of America	1997 – present
European Geophysical Society	1995, 2005, 2008, 2015
Clay Minerals Society	1991 – present
Meteoritical Society	1991 – present
Planetary Society	1991 - present
American Chemical Society	1990 - 1994
Sigma Xi, The Scientific Research Society	1990 – 2006

SKILLS & EXPERTISE

Planetary Remote Sensing: spectroscopic analysis of the mineralogy and surface processes on Mars and the Earth using remotely acquired and laboratory spectral data.

Astrobiology: spectral identification of aqueous minerals and organics in geologic samples in preparation for identifying them and characterizing habitable sites on planetary surfaces.

Laboratory: spectroscopic measurement and analysis including visible and infrared reflectance, emittance, Raman, and transmittance spectroscopy of Mars analogs; Quantification experiments using mixtures; Alteration experiments under Mars-like environments.

Field Work: sample collection and *in situ* analysis of clay-, sulfate- and carbonate-bearing rocks, rock alteration and coating formation.

Languages: fluent in German: speaking, reading, writing, lecturing; limited abilities in French.

SUCCESSFUL RESEARCH GRANTS AS PRINCIPLE INVESTIGATOR

- “Characterizing Variations in the Spectroscopic Features Due to H₂O and/or OH on the Surface of the Moon” Lunar Data Analysis Program (LDAP), 2022-2024.
- “Constraining the Mineralogical, Geochemical, and Climatic History of Juventae Chasma” Mars Data Analysis Program (MDAP), 2022-2024.
- “Characterizing the Geochemical Conditions Governing Formation and Reaction of Jarosite and Alunite Outcrops on Mars in the Context of Lab Experiments and Field Observations” Mars Data Analysis Program (MDAP), 2019-2022.
- “Providing Spectral Library Data to the PDS and CAT” Planetary Data Archiving, Restoration, and Tools (PDART) program, 2019-2022.
- “Analysis of the Effects of Aqueous Processes and Impacts in the South Isidis Region from Libya Montes to Tyrrhena Terra” Mars Data Analysis Program, 2018-2021.
- “Investigating Evidence of Acidic Alteration on Mars: Analyses of Unique Aqueous Outcrops at Valles Marineris, Noctis Labyrinthus and Mawrth Vallis” Mars Data Analysis Program, 2015-2018.
- “Characterizing Nanophase Materials on Mars: A Lab Spectroscopy and XRD Study of Allophane, Hydrated Silica, Iron Oxides/Hydroxides and Fe-Al-Si Oxide Species” Solar System Workings Program, 2015-2018.
- “Low temperature characterization of hydrohalite and related salts essential to life in the Atacama” Exobiology Program, 2013-2015.
- “Investigating the Mineralogy at Libya Montes, Mars, Determining if Carbonates are Present, and Characterizing the Geologic History of the Isidis Planitia Region” Planetary Geology and Geophysics Program, 2012-2015.

"A Study of Soil Formation and Rock Alteration Models Through Analysis of Spectroscopic, Magnetic and Chemical Data from Mars Pathfinder and S, Fe-bearing Analog Materials" Mars Data Analysis Program, 1999-2003.

"Spectral Identification of Organics and Carbonates in the Martian Surface Rocks" National Research Council Research Associateship at NASA-Ames Research Center, sponsor: Rocco Mancinelli, 1997-1998.

"Visible and Infrared Spectroscopic Analyses of Mars Soil Analogs" Alexander von Humboldt Research Fellowship at the DLR-Berlin, Germany, sponsor: Gerhard Neukum, 1994-1996.

"Spectroscopic Analysis of Iron-rich Montmorillonite as a Mars Soil Analog Material" NASA Graduate Student Researchers Program, sponsor: Sherwood Chang, 1990-1994.

SUCCESSFUL RESEARCH GRANTS AS CO-INVESTIGATOR

"Mapping and Analysis of Sulfates at Gale Crater from Orbital Data Sets and Preparing for Future Rover Exploration" (PI Catherine Wetiz, Planetary Science Institute) Mars Data Analysis Program (MDAP), 2019-2022.

"IceCrystal: Portable instrument protocol to delineate ancient ice and water on Mars using microcrystallinity of volcanic products" (PI Erika Rader, University of Idaho) Planetary Science and Technology from Analog Research Program, 2018-2021.

"Investigation of Anomalous Terrains on Olympus Mons" (PI Kim Seelos, JHUAPL) Mars Data Analysis Program, 2017-2020.

"Investigation of Sedimentary and Altered Deposits in and around Ladon Basin" (PI Cathy Weitz, PSI) Mars Data Analysis Program, 2017-2019.

"Constraining the Extent and Causes of Sedimentary Deposition and Aqueous Alteration in Coprates Chasma and Nearby Depressions" (PI Cathy Weitz, PSI) Mars Data Analysis Program, 2013-2016.

"Changing Planetary Environments & the Fingerprints of life" (PI Nathalie Cabrol, SETI Institute) NASA Astrobiology Institute, 2015-2020.

"Unraveling the sedimentary history of gypsum sand in the northern polar sand seas of Mars" (PI Lori Fenton, SETI Institute) Planetary Geology and Geophysics Program, 2012-2015.

"Laboratory and Theoretical Studies Enabling Quantitative Abundance Estimates of Hydrated-Hydroxylated Silicates from Visible and Near-Infrared Orbital Remote Sensing Data of Mars" (PI Ted Roush, NASA-Ames) Mars Fundamental Research Program, 2011-2014.

"Geologic Investigation of Interior Layered Deposits in Hebes Chasma and Noctis Labyrinthus" (PI Cathy Weitz, PSI) Mars Data Analysis Program, 2010-2013.

"The State of Sulfur on Mars: Understanding the Inter-relationships Among the Crystal Structure, Chemistry, and Spectroscopy of Sulfates and Sulfides" (PI Melissa Lane, PSI) Mars Fundamental Research Program, 2010-2013.

"Analysis and Characterization of Phosphates Using Multiple Spectral Techniques" (PI Melissa Lane, PSI) Mars Fundamental Research Program, 2008-2011.

"Integrated Spectroscopy of Synthetic Pyroxenes: Tools to Characterize Igneous Processes on the Inner Planets" (PI Carlé Pieters, Brown) Mars Fundamental Research Program, 2007-2010.

"Further Analysis and Characterization of Sulfates and Sulfides Using Multiple Spectral Techniques" (PI Melissa Lane, PSI) Mars Fundamental Research Program, 2005-2009.

"BIOsphere of Mars: Ancient and Recent Studies" (PI Jill Banfield, U.C. Berkeley) NASA Astrobiology Institute, 2005-2009.

"Planetary Biology, Evolution and Intelligence" (PI Chris Chyba then Rocco Mancinelli, SETI Institute) NASA Astrobiology Institute, 2005-2009.

"Analysis and Characterization of Sulfates and Sulfides Using Multiple Spectral Techniques" (PI Melissa Lane, PSI) Mars Fundamental Research Program, 2004-2005.

"Taking Apart the Rocks of Mars" (PI Carlé Pieters, Brown) Mars Fundamental Research Program,

2004-2007.

"CRISM" (PI Scott Murchie, JHU-APL) MRO Program, 2002-present.

TEACHING EXPERIENCE

Guest Instructor, Planetary Surface Processes: Shaping the Landscapes of the Solar System (taught by Mathieu Lapôtre), Geological Sciences course #120, Stanford University, 2021.

Guest Instructor, Introduction to Planetary Sciences (taught by Laura Schaefer), Geological Sciences course #124, Stanford University, 2021.

Osher Lifelong Learning Program (OLLI), Lecturer in courses taught by SETI Institute scientists at Santa Clara University, Santa Clara, CA and University of Calif., Berkeley (2016-2019)

Guest Professor and Instructor (Kurs 24320a: Mineralogische Erkundung des Mars mittels VIS/NIR Spektroskopie) course in Geological Sciences, Free University of Berlin, Germany, 2015.

REU (Research Experience for Undergraduates) lectures on Mars and Astrobiology, SETI Institute, 2010 to present.

Guest Lecturer, Astrobiology (taught by Alessandro Airo), Free University, Berlin, 2012.

Guest Lecturer, Astrobiology Space Exploration (taught by Lynn Rothschild), Human Biology, Stanford University, 2010.

Informal lectures on mineral spectroscopy, remote sensing, Mars, soil formation, and aqueous chemistry to students working with me at the SETI Institute and NASA-Ames, 2003-present.

Substitute Lecturer, Remote Sensing (taught by Carlé M. Pieters), Brown University, 1999.

Informal lectures on mineral spectroscopy to students at DLR, Berlin, 1994-1996.

Teaching Certificate, Center for Advancement of College Teaching, Brown University, 1993; course designed to enhance teaching skills for graduate students.

Teaching Assistant, part-time, Volcanology, Brown University, 1992: responsibilities included assisting students and grading assignments.

Teaching Assistant, Introductory Chemistry Laboratory Course, Brown University, 1989-1990; responsibilities included instructing students in the use of laboratory equipment and basic chemistry skills.

Teaching Assistant, Summer Science Program for accelerated high school students in astronomy and physics, Ojai, CA (sponsored then by the Thacher School, Pomona College and Stanford University; now independently operated) June-July, 1986 & 1987. Responsibilities included instructing students in the use of telescopes, dark room, and measuring engines.

STUDENT ADVISING

Advising Graduate Students (8):

1. Zachary Burton, School of Earth, Energy & Environ. Sciences, Stanford University, Ph.D. 2020.
2. Jacob Danielsen, Department of Geology, San Jose State Univ., MS., 2020.
3. Christoph Gross, Institute of Geological Sciences, Free University of Berlin, Germany, Ph.D. 2018.
4. Barbara Lafuente, Department of Geosciences, University of Arizona, Ph.D. 2016.
5. Muna Al-Samir, Institute of Geological Sciences, Free University of Berlin, Germany, Ph.D. 2015.
6. Mario Parente, Electrical Engineering Department, Stanford University, M.S. 2005.; Ph.D. 2010.
7. Nancy McKeown, Department of Earth and Planetary Sciences, University of California Santa Cruz, Ph.D. 2010.
8. Heather Makarewicz, Mathematics Department, University of Kansas, M.S. 2009; Computer Science and Engineering Department, University of Kansas, M.S. 2010.

Advising Undergraduate Students (25):

- 1 Kierra Wilk, Rensselaer Polytechnic Institute, summer-fall, 2020
- 2 Fiona Grant, University of Calif. at Los Angeles, summer-fall, 2020
- 3 Gabriela Usabal, Brown University, summer 2018.
- 4 Jasper Miura, Brown University, summer 2018.
- 5 Tatiana Gibson, California Polytechnic State University, summer 2018.
- 6 Selena Perrin, Stanford University, 2016-2018.
- 7 Jacob Danielsen, San Jose State Univ., 2016-2017.
- 8 Sara King, Sacramento State Univ., 2013-2014.
- 9 April Davis, MiraCosta College, 2013-2014.
- 10 Alicia Noel, UC Davis, 2012-2013.
- 11 Shital Patel, San Jose State University, 2012-2013.
- 12 Ian Szumila, Rensselaer Polytechnic Institute, summer 2012.
- 13 Amanda Aguilera, San Jose State University, 2011-2012.
- 14 Lee Saper, Brown University, summer 2010.
- 15 Bill Freeman, Louisiana State University, summer 2010.
- 16 Lauren Hunkins, University of South Florida, summers 2009-2011.
- 17 Laura Bayley, Brown University, summer 2009.
- 18 Kaysea Perry, California Polytechnic State University, summer 2009.
- 19 Elena Amador, University of California Santa Cruz, summer 2008.
- 20 Alicia Muirhead, University of California Santa Cruz, summer 2008.
- 21 Trevor Clark, University of California Davis, summer 2007.
- 22 Nancy Garcia, Texas A & M University, summer 2007.
- 23 Andrew Honma, University of Hawaii, summer 2007.
- 24 Heather Makarewicz, Nazarene University, summer 2007.
- 25 Rebecca Sullivan, University of Texas El Paso, summer, 2004.

Student Advising at the Summer Science Program:

- Teaching Assistant and Residence Assistant at 6-week astronomy Summer Science Program for rising high school seniors, <https://summerscience.org>, 1986-1987. Instructed students in use of telescopes for observing asteroids, dark room for developing plates, and measuring engines for determining distances between their asteroid and stars in their study region. Assisted students with homework in calculus, physics, and astronomy, and provided guidance for calculations to determine the orbit of their asteroid. Responsibilities also included counseling, mentoring, and leading extracurricular activities (e.g., card games, sports, hikes, talent show).

Student Advising while at Stanford University:

- Residence Assistant at Haus Mitteleuropa (German Language Theme Residence), 1987-1988. Selected for highly competitive position as student leader and liaison between student dormitory and residential management. Responsibilities included counseling, mentoring, and working with dormitory staff.
- Academic Advisor, 1985-1987. Selected to work jointly with faculty advisor to provide advice on a variety of academic issues including courses, major, and career directions. Met once per week with group of six freshman students.
- Math Tutor, 1984-1985. Selected from Freshman Honors Math course to provide tutoring in calculus and introductory math to students needing extra assistance.

PUBLICATIONS

Total Peer-Reviewed Publications: 155

Peer-Reviewed Book Chapters: 12

1. Bishop J.L. (2019) Chapter 4: Visible and near-infrared reflectance spectroscopy of geologic materials. In: *Remote Compositional Analysis: Techniques for Understanding Spectroscopy, Mineralogy, and Geochemistry of Planetary Surfaces*, eds. J. L. Bishop, J. F. Bell, III and J. E. Moersch (Cambridge University Press, Cambridge, UK), 68-101.
2. Lane M.D. & Bishop J.L. (2019) Chapter 3: Mid-infrared (thermal) emission and reflectance spectroscopy. In: *Remote Compositional Analysis: Techniques for Understanding Spectroscopy, Mineralogy, and Geochemistry of Planetary Surfaces*, eds. J. L. Bishop, J. F. Bell, III and J. E. Moersch (Cambridge University Press, Cambridge, UK), 42-67.
