

Space Science Master

“One of the reasons I like working with schools is to try to convince [young] women that they can be scientists and that science can be fun.”

—Nancy Roman, one of the first female executives at NASA known as “Mother of Hubble” for her role in planning NASA’s Hubble Space Telescope.

Scientists and engineers who work on NASA space science projects are 21st century explorers. You can explore, observe, design, and communicate what you discover—just like they do. Since space science encompasses the entire Universe, there are lots of topics that might pique your interest. Dive in and explore NASA and space science!

Steps

1. Discover worlds beyond Earth
2. Dive into NASA science
3. Explore your interests
4. Dig deeper
5. Share what you’ve learned

Purpose

When I’ve earned this badge, I will understand more about space science and ways that I can be a part of NASA now and in the future.
