CAREER
OBJECTIVE

Drive ground-breaking technical developments in Astronomy leveraging a team-based position, with emphasis on implementing Lean and Agile principles to make the complex simple.

EDUCATION

New Mexico State University (NMSU), Las Cruces, NM

Ph.D., Astronomy. September 2012.

M.S., Astronomy, with Honors. May 2010.

Emory University, Atlanta, GA

B.S., Physics & Astronomy, Minor in Spanish, Summa cum Laude. May 2007.

AWARDS

NASA's Exceptional Engineering Achievement Medal (2016)

- For leadership and innovation in the construction of the first uniform *Kepler* planet candidate catalog

National Science Foundation (NSF) Graduate Research Fellow (2009)

NASA Graduate Student Research Program Fellowship (2009, Declined)

NMSU Astronomy ZIA Research (2009) and **Murrell Professional Development** (2012) **Awards**

SPECIAL
SKILLS**Computing and Programming**

- Professional use of C/C++, Python, MATLAB, AWK, Unix tools and shell scripting, HTML/CSS/CGI, JIRA, GIT, SVN, Gnuplot, L^AT_EX, Word/Excel, Linux, Mac OSX, and Windows.
- Special experience with workflow automation, pipeline validation, optimization of multi-parameter models, genetic algorithms, large dataset processing, PCA/SVD, and robust statistical inference.

Technical Communication

- 10 first-author and 10⁺ co-author publications in peer-reviewed journals. ([Link to List](#))
- 30⁺ talks and posters at professional conferences and academic colloquia.

Foreign Languages

- Spanish: Professional working proficiency both written and spoken.

RESEARCH
AND
WORK
APPOINTMENTS**SETI Institute / NASA AMES**

Kepler Science Office Support Scientist

Nov 2012 to Present

- NASA's Kepler Mission is a space-based telescope that monitored ~200,000 stars for four years at 30-minute cadence with unprecedented photometric precision. Its main goal is to discover and characterize Earth-like and other planets to determine their occurrence rate. We work together to comb this very large data set for planetary signals, statistically validate them, and obtain robust estimates of the physical parameters of each planet. We publish the results both in scientific journals as well as write easily-accessible documentation for the publicly-released data.
- My main role has been to lead the team that reviews candidate planetary transit signals. I develop algorithms and software products to support operational decision making in the classification of these planetary signals. Utilizing human and automated vetting techniques, alongside emulation of true and false positives, we statistically validate the Kepler pipeline and create robust planet catalogs sufficient for accurate occurrence rate determinations. As part of the science team, I also help prioritize our research to meet mission deadlines and communicate our progress to management, and work with NASA archives to properly archive and document our results.

New Mexico State University, Las Cruces, NM

NSF Graduate Research Fellow

May 2009 to Sept 2012

- I conducted research on extrasolar planets and eclipsing binary stars in collaboration with domestic and international Astronomers. I focused on automated detection methods and robust modeling and statistical inference for the determination of planetary parameters. I worked extensively with data from the Kepler Mission and ground-based telescopes.

Laboratory Instructor

June 2007 to May 2009

- Taught a laboratory session for a 100-level Astronomy course for undergraduates.

Research Assistant

June 2007 to May 2009

- Operated and maintained the NMSU robotic 1-meter telescope for the department.

Apache Point Observatory, Sunspot, NM

Observing Specialist

Dec 2007 to May 2010

- I operated a 3.5-meter telescope and worked with remote users for nightly data collection.

Emory University, Atlanta, GA

Laboratory Instructor

Jan 2007 to May 2007

- Prepared and taught labs for both intro and upper-level Astrophysics courses.

Astronomy Teaching Assistant

Jan 2005 to Jan 2007

- Tutored students from both scientific and non-scientific backgrounds, such as business.

LEADERSHIP AND VOLUNTEER POSITIONS

New Mexico State University, Las Cruces, NM

President, Astronomy Graduate Student Organization

Aug 2010 to July 2011

- Organized weekly meetings of the graduate students to discuss department-related issues, then met with faculty to address and resolve those issues.

VP, Astronomy Graduate Student Organization

Aug 2008 to July 2009

- Coordinated over 500 hours of volunteer and outreach service by the Astronomy department.

2009 Relay for Life Team Coordinator

Jan 2009 to April 2009

- Led the NMSU Astronomy Relay for Life team to raise money for the American Cancer Society.

Emory University, Atlanta, GA

President, Outdoor Emory Organization

Feb 2006 to Feb 2007

- Presided over an organization with 400 members that focused

President, Emory Astronomy Club

Feb 2005 to Feb 2007

- Led club meetings and organized public open houses for Astronomy education.
